Environmental Sustainability Policy

We are a biotechnology company specialized in the development, production, and commercialization of solutions aimed at animal and environmental health.

We seek to contribute to strengthening the health status of each country, promote new productive developments, and ensure the well-being of animals, humans and the environment.

We work under the one health approach

- At Biogénesis Bagó, we operate in alignment with the “One Health” concept, which establishes that human health and animal health are interdependent and linked to the ecosystems in which they coexist.
- We are committed to the prevention, control, and eradication of zoonotic diseases in different regions of the world.

Our organization is committed to integrating environmental sustainability into all its operations, guided by the following principles:

1. **RESPONSIBLE PRODUCT DESIGN AND DEVELOPMENT:** We develop our products in compliance with environmental regulations, legal requirements, and other applicable standards, prioritizing the well-being of our employees, the community, and the environment. We promote the sustainable development of the communities in which we operate, actively contributing to their economic, social, and environmental growth.

2. **COMMITMENT TO OUR CLIENTS AND INDUSTRY STAKEHOLDERS:** We act with sensitivity and responsibility toward the needs of our clients and all stakeholders linked to animal health. We foster long-term relationships based on trust, respect, and transparency, supporting the lifecycle of our products with innovative and sustainable solutions.

3. **INNOVATION AND CONTINUOUS IMPROVEMENT:** We promote a culture of innovation and proactivity that allows us to adapt to global animal health challenges.
We implement concrete actions to protect the environment, including pollution prevention, climate change mitigation, sustainable use of resources, biodiversity protection, and

4. **HUMAN DEVELOPMENT AND DIVERSITY:** We encourage the personal and professional growth of our employees, strengthening integrated teams that reflect a culture of belonging, respect, and diversity.

5. **EFFICIENT MANAGEMENT AND SHARED OBJECTIVES:** We establish clear and achievable goals, providing the necessary resources and training to accomplish them. We manage our resources efficiently, ensuring return on investment, competitiveness, and sustained growth. We strive to meet the expectations of our clients, shareholders, employees, and other stakeholders, balancing economic, environmental, social, and ethical dimensions.
